

PB0: If you want to invoke a cold-start, you may first press [CTRL] and [RESET] simultaneously, followed by a press on PB0 and then yuou release [CTRL] and [RESET] followed by [PB0]. In so doing you can do without powering off the system.

PB1: This key is used for self-test of the system. First, press [CTRL] [RESET], followed by pressing [PB1]. Release [CTRL] [RESET] first and then [PB1]. After these steps are completed, the MPF-III will start testing RAM, ROM, together with Sound Generator and Colour Bar Test.

AKD: Any Key Down. If any key is pressed, the signal is high. Otherwise, it is low.
